## **SAFETY INSPECTION**

OSHA Safety Inspection  
Course: Hours Instruction  
Hours: Class Room  
Hours: Field Instruction

Regulation  
Prerequisites:  
Fee:  
CE Credits:

Workplace visits by OSHA and related safety inspections without warning may result in the discovery of violations and millions of dollars in fines. Safety and health inspections are shown to be essential parts of the hazard control process. Organizations must be proactive to conduct their own in-house safety inspections in their safety programs.

Do you know if your safety program or intervention is making an impact? The answer is critical to directing injury prevention resources.

This course shows you how to conduct systematic, rigorous evaluations of safety programs and interventions. You'll get the concepts and tools you need to gather scientific evidence and assess the effects of injury prevention initiatives. The program emphasizes evaluation techniques at the planning, implementation and outcome stages of an intervention program as you concentrate on how inspections are conducted and how the information is used to improve safety and health. Learn the most commonly used safety inspection standards, tools and techniques and an organized approach to inspecting and auditing projects to insure OSHA compliance and injury prevention. Learn proven evaluation methods for measuring safety program effectiveness as our compliance specialists provide information on the necessary elements for instruction on conducting effective safety inspections.

### **Who Should Take This Course:**

- Those responsible for conducting or supervising safety inspections and those responsible for training industrial safety and/or health inspectors
- All levels of management, safety practitioners, safety committee members, and individuals responsible for investigating accidents (incidents)
- Supervisors, lead personnel, foremen and others who are involved in accident prevention and compliance in business, industry, government, schools and other organizations

### **Course Objectives:**

- Plan and conduct a safety inspection
- Complete inspection reports

# UNITED SAFETY SOLUTIONS
